K-GPT Meme Coin

Official Whitepaper | Solana | 2025

Community · DAO · Decentralized · AI

Date: 2025-08-07

Table of Contents

1. Introduction

K-GPT is a Solana-based meme coin combining AI and blockchain innovation.
Inspired by Turbo Token, PEPE, Dogecoin, and meme coin philosophy,
we build a transparent and fair ecosystem leveraging community and AI intelligence.
Anyone can participate, and everyone is a protagonist!

K-GPT Core Values
• Community-driven: All decisions are led by the community
• Fully decentralized: Transparent operation with no central authority
• AI collective intelligence: Synergy of AI and community
• Global connection: Linked to the global meme ecosystem

K-GPT Meme Philosophy
Where fun meets innovation, a digital space where everyone is a protagonist
We are not just a token, but a new culture and community

Token Address: 5nWHCcq8TH9QATAk6ZJdjFDGVQXdp62ABiy4Dp93r3K6
Blockchain: Solana | Token Standard: SPL | Decimals: 4
Total Supply: 100,000,000 K-GPT

2. Tokenomics

Total Supply: 100,000,000 K-GPT
Initial Distribution: Community/Marketing/Event 80,000,000 / Founders/Team 20,000,000
Key Features: No transaction fees, renounced ownership, transparent operation
Community-driven distribution and governance, LP token burn, fully decentralized

Token Distribution Ratio

Category	Amount
Total Supply	100,000,000 K-GPT
Community/Marketing/Event	80,000,000
Founders/Team	20,000,000
Transaction Fee	None
LP Token Burn	Fully Decentralized

3. Technology

Solana SPL Token (Decimals=4), fast transactions and low fees
K-GPT is based on Solana blockchain, boasting ultra-fast transactions and low fees.
Follows SPL token standard, tradable in real-time on various DEXs.
Integrated with major DEXs like Raydium, Orca, Jupiter for easy trading.

Tech Stack

• Solana Blockchain: 65,000 TPS
• SPL Token Standard: Solana native token protocol
• Low Fees: Avg. 0.00025 SOL per transaction
